SUMMARY

Full Stack Software Engineer with hands-on experience building scalable web applications and database-backed services using React, FastAPI, Django, Flask, and PostgreSQL. Proven track record delivering production-ready systems in agile startup environments, with practical exposure to database schema design, query optimization, and IoT data pipelines. Seeking to contribute to high-impact engineering teams with a focus on backend APIs, database services, and modern frontend development.

EDUCATION

- GITAM University** Bengaluru, India
B.Tech in Computer Science Engineering | CGPA: 7.2/10.0 2022 – 2025
 - Relevant Coursework:** Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming

EXPERIENCE

- Alstonair Technologies** Bengaluru, India
Full Stack Software Engineer Apr 2026 – Present
 - Full Stack Development:** Engineered RESTful APIs and responsive frontend interfaces using React, FastAPI (Python), and Django in an agile 5-member startup team, delivering production-ready features across bi-weekly sprints. Designed and optimized PostgreSQL database schemas, reducing query latency through indexing and efficient ORM patterns. Built FastAPI microservices with async endpoints and PostgreSQL integration via asyncpg, supporting scalable backend architecture. Administered PostgreSQL instances including schema migrations, query performance analysis, and connection pooling configuration in a Linux-based environment.
- GITAM University** Bengaluru, India
Field Assistant – IoT Research Sep 2025 – Mar 2026
 - DST-Funded IoT Research Project:** Contributed to the government-funded project "Information and Technology assisted Silk Cocoon Farming for the Upliftment of the Socio-Economic Status of Backward Community Rural Mass." Integrated IoT field sensors (ESP32, DHT22) for real-time environmental monitoring, managed cloud data pipelines via ThingSpeak, and developed supporting software solutions. Led and conducted a two-day bilingual Kannada/English farmer workshop attended by 40+ participants, translating technical IoT concepts for non-technical rural audiences.
- Himalaya Wellness Company** Bengaluru, India
Software Developer Intern Jan 2025 – Feb 2025
 - Geolocation-Based QR System:** Designed and developed a geolocation-based QR code redirection and targeted marketing system using .NET and SQL Server, improving campaign tracking accuracy for 3+ active marketing campaigns through location-aware dynamic routing and automated redirect logic.

TECHNICAL SKILLS

- Languages:** Python, Java, JavaScript, SQL, Unix Shell Scripting, C
- Frontend:** React, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Bootstrap
- Backend:** FastAPI, Django, Flask, Spring Boot, Express.js, Node.js
- Databases:** PostgreSQL, MySQL, Supabase, SQL Server
- Cloud & DevOps:** Azure (Student Credits), Git, GitHub Actions, Vercel, Linux/Unix, Postman, VS Code
- Concepts:** REST APIs, JWT Authentication, Microservices, High Availability, Database Monitoring, Agile/Scrum, CI/CD, Role-Based Access Control
- AI & LLM Tools:** Ollama, Cursor, Claude, Gemini
- IoT & Embedded:** Arduino, Raspberry Pi, ESP32, Blynk IoT, ThingSpeak

PROJECTS

- **GitPilot – AI-Powered GitHub CLI Tool** | *Python, Ollama, GitHub API, PyPI* **Mar 2026**
Engineered and published an open-source AI-powered CLI tool to PyPI, automating GitHub workflows using local LLMs via Ollama. Features include AI-generated commit messages (cutting commit documentation time by ~80%), automated README creation, and repository management. Packaged with `pyproject.toml` using `setuptools.build_meta`; leverages `granite3.3:8b` for high-quality text generation.
- **Secure Form-Based Data Collection System** | *Next.js, Node.js, Express, Supabase, PostgreSQL, Tailwind CSS* **Jul 2025 – Mar 2026**
Designed and deployed a full-stack community data management platform with Supabase Auth supporting email and Google OAuth. Implemented role-based access control (RBAC) with JWT verification via a Node.js/Express backend. Admin dashboard features search, edit, delete, pagination, role filters, and CSV export across 15+ personal data fields. PostgreSQL schema designed for efficient querying and data integrity across multiple user roles.
- **Smart Irrigation System** | *C, Python, ESP32, Prophet ML, Blynk IoT, ThingSpeak* **Jul 2024 – Mar 2025**
Engineered an end-to-end IoT-based smart irrigation system integrating ESP32, DHT22, YL-69, and YFS-201 sensors. Leveraged Facebook Prophet ML for predictive crop rotation analytics and a live weather API for automated irrigation decisions. Reduced manual intervention through real-time Blynk IoT dashboards and ThingSpeak data pipelines.
- **Financial Portfolio Tracker** | *Python, Flask, SmartAPI, HTML, CSS* **Feb 2024 – Mar 2024**
Developed a full-stack Flask web application integrating live market data via SmartAPI for real-time portfolio performance analysis. Implemented server-side data aggregation with Python and MySQL for persistent portfolio storage, enabling data-driven investment decisions for individual investors.

ACHIEVEMENTS & EXTRACURRICULARS

- | | | |
|--|--|----------|
| ● 2nd Runner-up – SAE India REEV
<i>Infotainment System Lead</i> | ● Directorate of External Affairs
<i>Campus Branding Lead, GITAM</i> | Feb 2026 |
| ● Runner-up – SIH Internal Hackathon
<i>Team Participant</i> | ● Rotaract Club
<i>Special Events Organising Committee</i> | Sep 2023 |
